

## 2002-04 Revised Tuition Rates

Tuition rates for 2002-04, as revised by the institutions, are shown in Attachment A. At the September 2001 council meeting, 2002-04 tuition rates were presented as background information for the 2002-04 budget recommendation process. Since then, four institutions – Kentucky State University, Murray State University, Northern Kentucky University, and the University of Louisville – have revised their 2002-03 rates. Murray and Northern had originally reported ranges for tuition rates. The final rates approved by the respective boards (see page 51) take into account the 2002-03 state funding levels.

Beginning with the 2000-02 biennial budget process, the council delegated tuition-setting responsibility to the institutions. The institutions set tuition within the parameters of the tuition-setting guidelines approved by the council. At the same time, the council put in place a system of monitoring tuition rates to be sure that postsecondary education remains affordable to Kentuckians.

Over the past three years, tuition rates for in-state, full-time undergraduate students have increased an average of 9.4 percent. While tuition increases have out-paced inflation, it is important to also look at rates relative to personal income as compared to institutions in other states. Attachment B shows tuition as a percent of per capita personal income (PCPI) for each Kentucky institution and their benchmarks for 1999-2000 and 2001-02 – the most recent tuition and PCPI data available for the benchmarks. All Kentucky institutions show an increase in the percentage tuition represents of PCPI – that is, it takes a larger percentage of personal income to pay for college. However, this percentage at all institutions except UK and Lexington Community College is at or below the midpoint of their respective benchmark institutions. This would suggest that Kentucky remains a relatively low tuition state.

Given these tuition increases, are tuition rates at Kentucky's postsecondary institutions still affordable to Kentuckians? *Measuring Up*, published by the National Center for Public Policy and Higher Education, assigns states a letter grade in five categories including "affordability." In 2000, Kentucky received a "B" in affordability. In the 2002 version of *Measuring Up* Kentucky's score is a "C." This lower grade is due first to the increase in the gap between Kentucky's performance and that of the best performing states. The amount of state need-based aid targeted to low-income students in the top performing states exceeds the amount of aid they receive from the federal government. In Kentucky the average state need-based grant is 38 percent of federal aid. Second, the 2002 version of *Measuring Up* uses tuition data from 2000 to calculate affordability. Recent increases in tuition and declining family income may result in lower affordability grades in 2004. For more detail on *Measuring Up*, see the agenda item beginning on page 13. As part of the background work for the 2002-04 budget process, the council staff is currently working with KHEAA staff on a study of financial aid.

While none of the institutions' boards have taken action on tuition rates for academic year 2003-04, it can be expected that some will be revised. Updates on any revisions in 2003-04 rates will be provided at the November 2003 meeting.

Staff preparation by Linda Jacobs

\* 2002-03 rates include mandatory student fees. The NKU board voted to "bundle" tuition and fees at all levels beginning in Fall 2002.

\*\* Graduate and Business graduate students will be charged for each credit hour with no cap.

\*\*\* Metro rates are charged to degree seeking students within specific Ohio counties.
